NOTION TEMPLATE

Student Dashboard

One Notion page that runs your entire college life.

- **Semester Overview**
  All courses, credits, and professors in one place
- **Assignment Tracker**
  Due dates, status, and priority for every assignment
- **Grade Tracker**
  Track your grades and watch your GPA update as you go
- **Weekly Schedule Builder**
  Build your perfect weekly schedule visually
- **Study Session Log**
  Track how long you're actually studying
- **Budget Tracker**
  Simple income and expense tracking built right in

Requires a free Notion account · Setup takes 5 minutes

HOW TO SET UP YOUR DASHBOARD

Step 1	**Create a free Notion account** Go to notion.so and sign up with your student email. The free plan is plenty for this dashboard.
Step 2	**Duplicate the template** Visit the link on page 3 of this PDF. Click 'Duplicate' in the top right corner to copy it to your workspace.
Step 3	**Add your courses** Open the 'Semester Overview' section and add each of your classes for this semester.
Step 4	**Set up your assignments** In the 'Assignments' tracker, add your first batch of due dates. Pro tip: do this on the first day of classes.
Step 5	**Fill in your schedule** Use the weekly schedule page to map out when your classes, work shifts, and study blocks happen each week.
Step 6	**Use it every day** Open the dashboard every morning. Check off what's done. Add new assignments as they come in.

YOUR TEMPLATE LINK

Note: You may need to set up a public Notion template page and update this link before sending to buyers. See the README in hq-files/etsy/ for instructions.

QUICK TIPS FOR USING NOTION

Use /	Type a forward slash anywhere to open the command menu and add new blocks.
@ mentions	Type @ followed by someone's name or a page name to link to it.
Database filters	In any table/database view, use 'Filter' to show only what you need (e.g., only assignments due this week).
Mobile app	Download the Notion app for iPhone or Android — works great on your phone for quick updates.
Keyboard shortcuts	Cmd+N (Mac) or Ctrl+N (PC) opens a new page. Ctrl+/ opens the properties panel.
